"What causes innovative thinking to be generated? I think it's actually a way of thinking. You must make the decision"

- Elon Musk.

Dear Delegates,

Welcome to SIMUN 2021. We are Paula Sarzo, Pablo González, María José Jiménez and Daniela Mora, and we have the pleasure to coordinate the United Nations Office for Outer Space Affairs Committee. First of all, we are hugely grateful for your decision of joining us and trusting us as chair of this committee.

Nowadays, technology has overlapped and integrated into our lives, so it is of utmost importance that its role in society is discussed. Primarily, we will focus on space technology as well as its global benefits and risks. Similarly, we will address the problems that have arisen related to outer space and those that may arise in the future. Therefore, we ask you to use your wits to seek a resolution. If you have any questions regarding the topics or the overall development of the debate, do not hesitate to contact us. We are at your disposal.

We will provide with the greatest enthusiasm and dedication an experience with vast learning, always seeking the optimal and enjoyable development of your skills of reasoning, communication, and analysis of the different situations that will be presented throughout the model. In the same way, we encourage you to prepare various perspectives and approaches. We are committed to guaranteeing that your time at this model is complete, organized, and more than anything, fun and unforgettable. We also hope that your cooperation and interest will be parallel to our efforts.

Sincerely,

The Chair of the United Nations Office for Outer Space Affairs Committee.
